# OPEN SOURCE GARDENS

....where openness is sown, freedom is grown!

VISION

We create "Open Source Gardens", introducing people to Open Source (philosophy/software/seeds) in a horticultural and creative way.

In our gardens and in community gardens we plant "Open Source Seeds" — seeds that are available to all people as public good (commons).

By doing, we learn with and from each other and exchange ideas about gardening and open source. We get to know each other further and grow together into a strong community.

In the garden and online.

GROW WITH US!

The best way to join our movement is to simply start growing Open Source Seeds by yourself - at home, in your garden, or in any place of your choice.

Then tell us and others about it and ...

JOIN THE COMMUNITY

Connect with other Open Source Gardeners
Meet people like you online and grow your passion.*

Join us in creating the Internet of Gardens

SPREAD THE WORD!

Share y/our vision! Tell the world about your Open Source Garden - or your closest friends.

Take photos or paint a picture. Invite friends or share them online.

Use the hashtags #OpenSourceGardens and #OpenSourceSeeds so others can connect with you.
